Anbefalet papir til udskriften

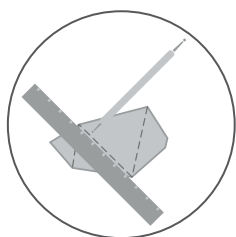

Det officielle, færdige produkt printes på omtrent 235 grams papir.

Bør udskrives på mindst 160 grams A4-papir.

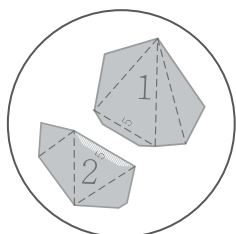

Når du udskriver, skal du vælge dobbeltsidet udskrift, vend på den lange side og farveprint.

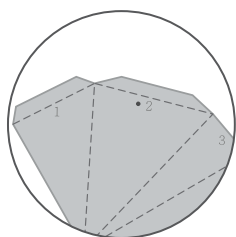

1. Skær formerne ud langs de hele linjer.

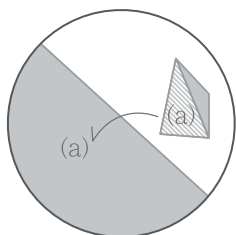

2. Brug en foldepen (eller bagsiden af en hobbykniv) til at markere langs de prikkede linjer.

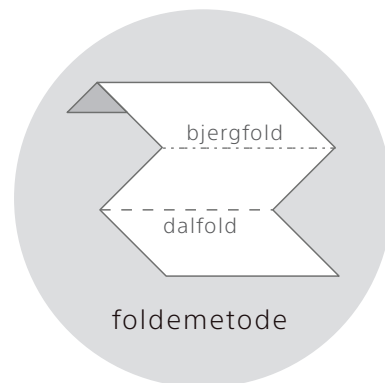

3. Lim eller indsæt stykkerne i numerisk rækkefølge (for de store tal), og læg så de små tal sammen, og lim flapperne (her behøver du ikke følge tallenes rækkefølge)

4. Begynd at lime fra de flapper, der er markeret med "." for at lette de efterfølgende trin

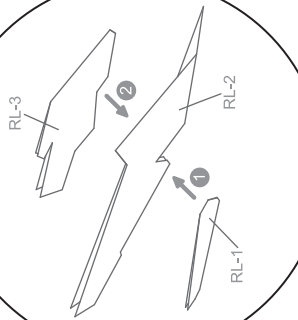

5. Når de ekstra dele er samlet, sammenholder du tallet på delene med samme tal på hovedkroppen, og så limer du dem eller indsætter dem.

'R' = right side
'L' = left side
