Se recomienda papel de impresión

El producto oficial está impreso en un papel de unos 235 g/m² aproximadamente.

Imprímelo en un papel A4 de 160 a 180 g/m² o superior.

Cuando lo hagas, elige una impresión a tamaño doble, reverso de borde largo y color.

1. Recorta las formas por las líneas continuas.

2. Usa un lápiz para pliegues (o la parte trasera de un cúter) para marcar por las líneas de puntos.

3. Pega o inserta las piezas en orden numérico (los números grandes), después encaja los números pequeños y usa el pegamento en las solapas (no hace falta seguir un orden numérico).

4. Empieza a pegar desde las solapas con la marca "." para facilitar los siguientes pasos.

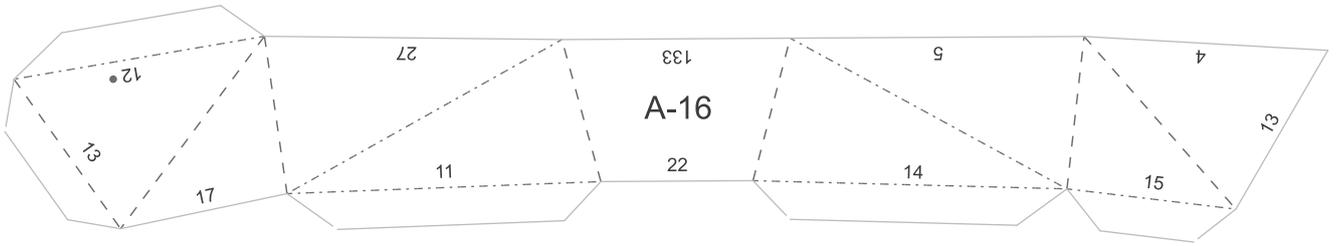

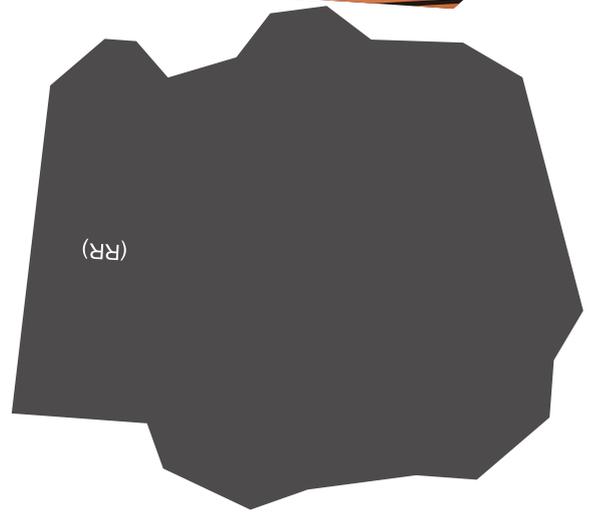

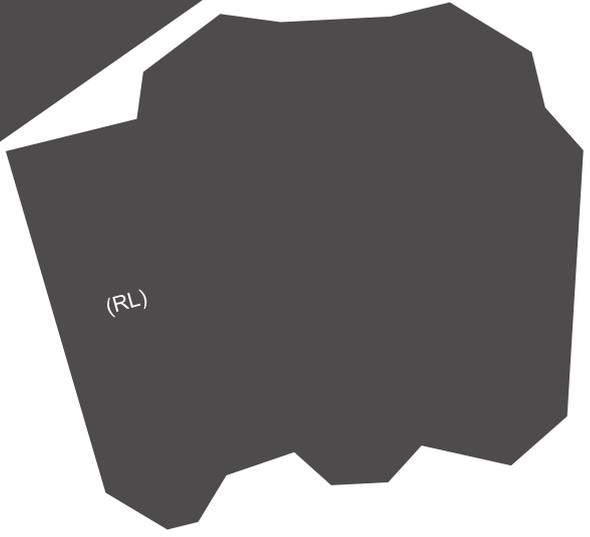

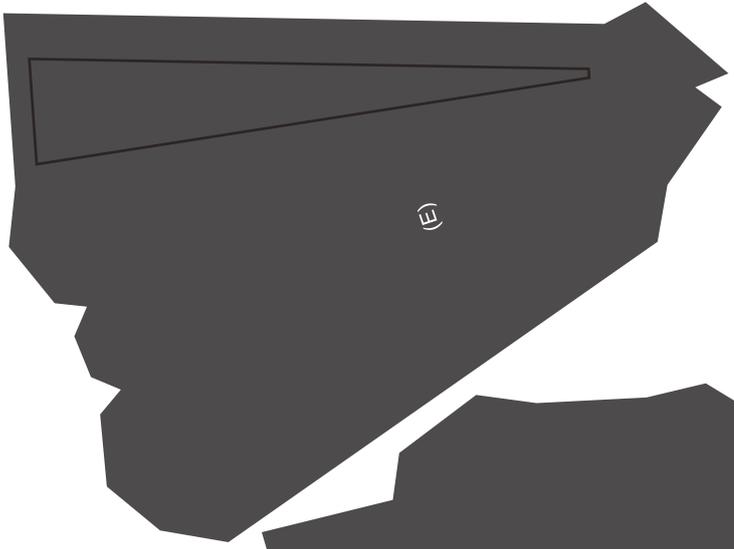

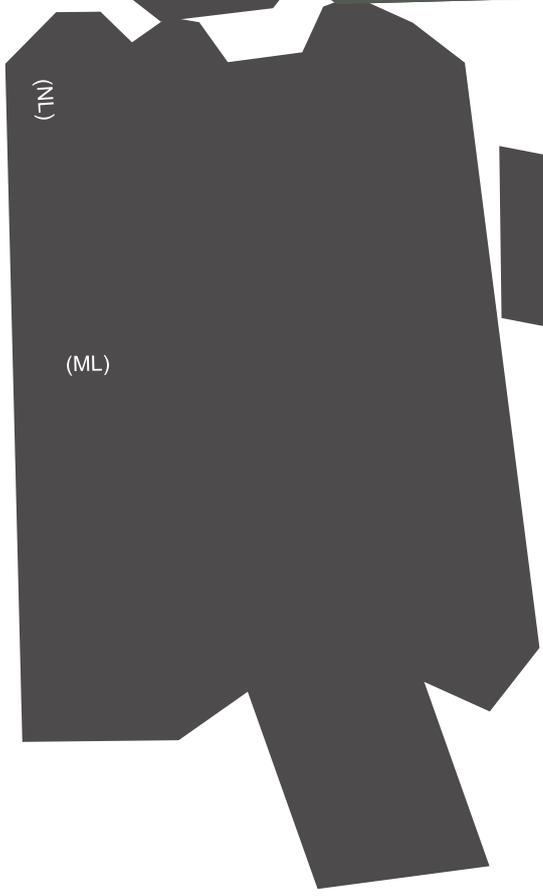

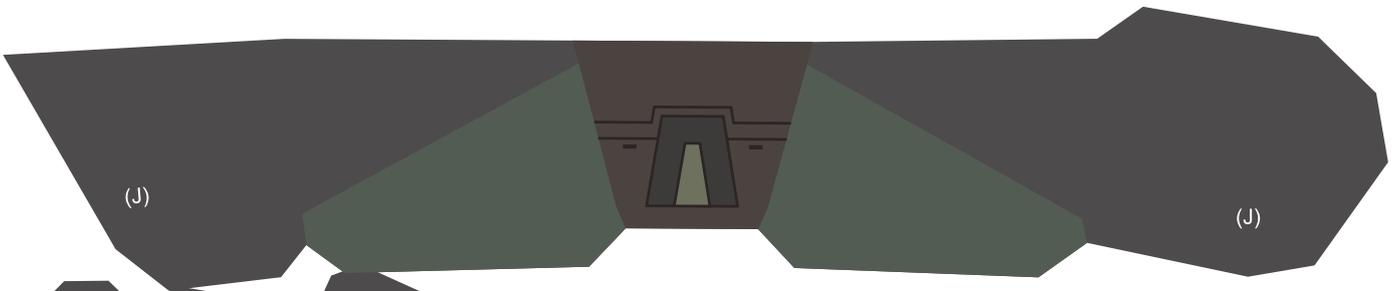

5. Cuando las demás partes estén montadas, encaja el número de las partes con el del cuerpo principal, y después pégalas a la zona con pegamento o insértalas.
