Se recomandă hârtie de imprimantă

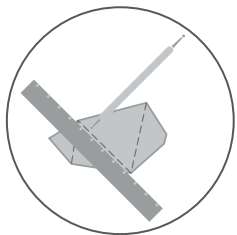

Produsul finit oficial se imprimă pe hârtie de aproximativ 235 g/m².

Imprimă pe hârtie A4 de cel puțin 160 g/m² – 180 g/m².

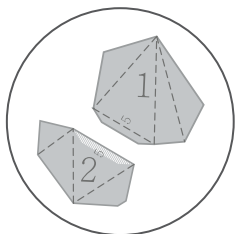

Alege imprimarea color pe ambele fețe, cu răsturnare pe muchia lungă.

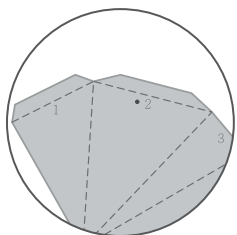

1. Decupează formele urmând liniile continue.

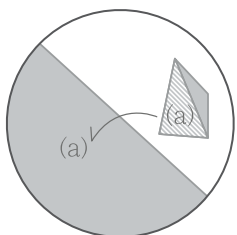

2. Folosește un creion de cutat (sau partea boantă a cutterului) ca să marchezi hârtia de-a lungul liniilor punctate.

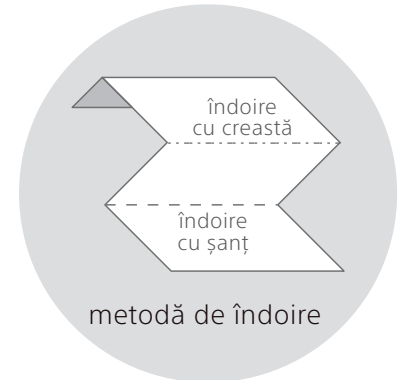

3. Lipește sau introdu piesele în ordinea numerelor (numere mari), apoi potrivește numerele mici și dă cu adeziv pe aripioare (nu e important să respecti ordinea numerelor)

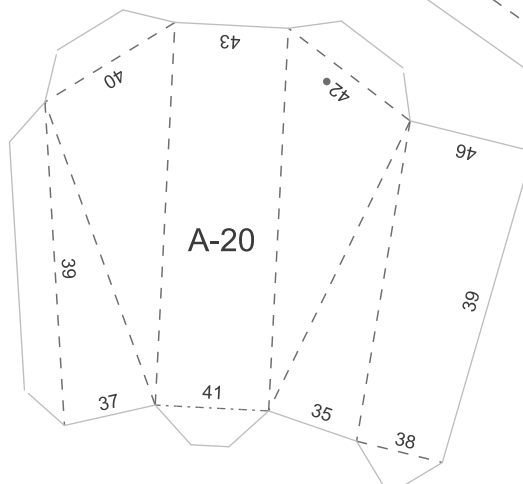

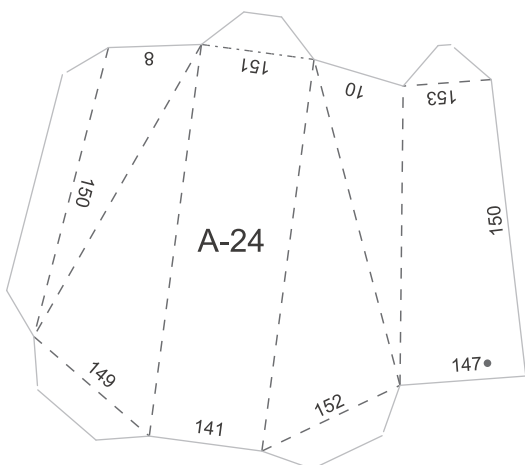

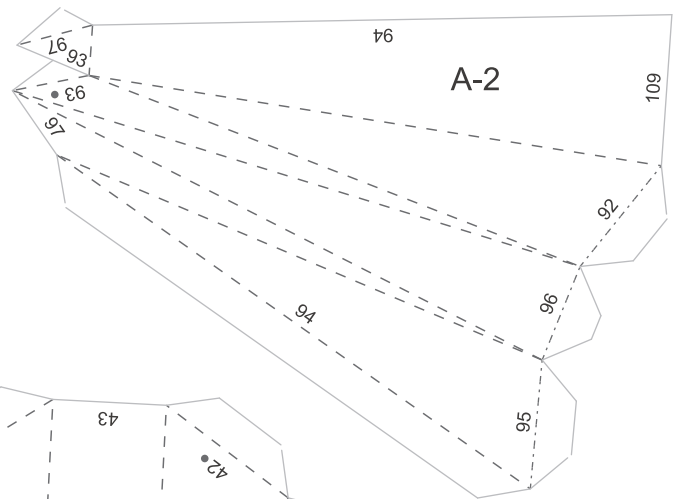

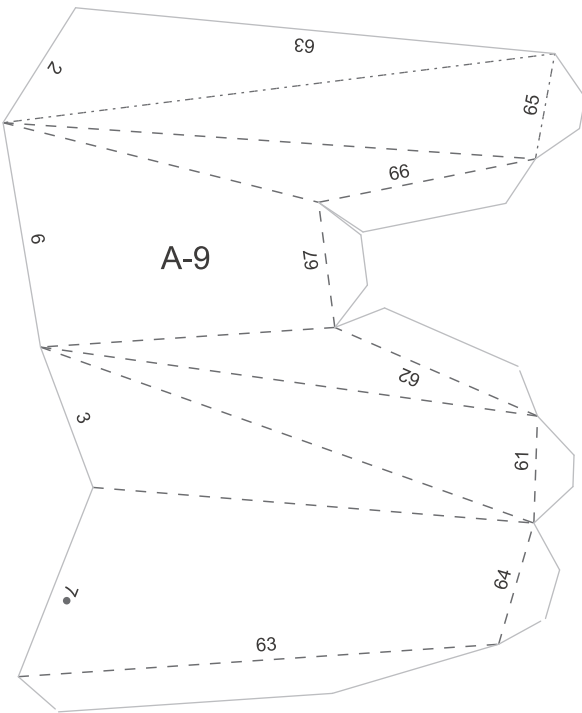

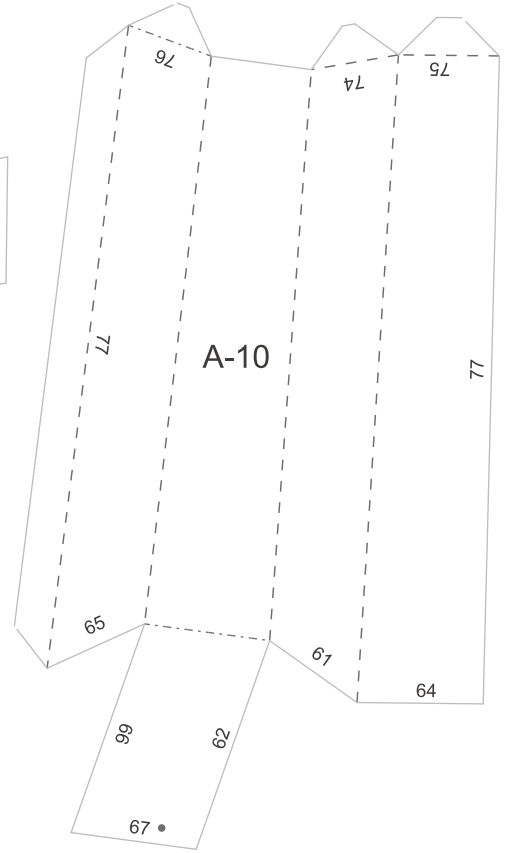

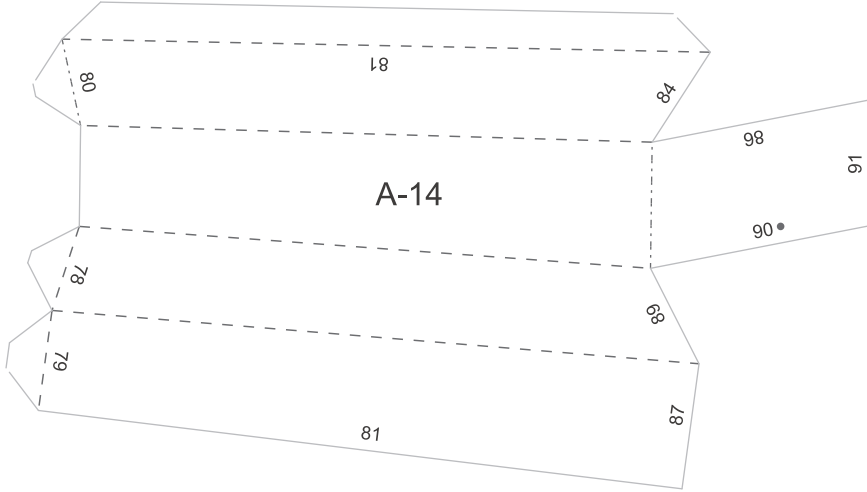

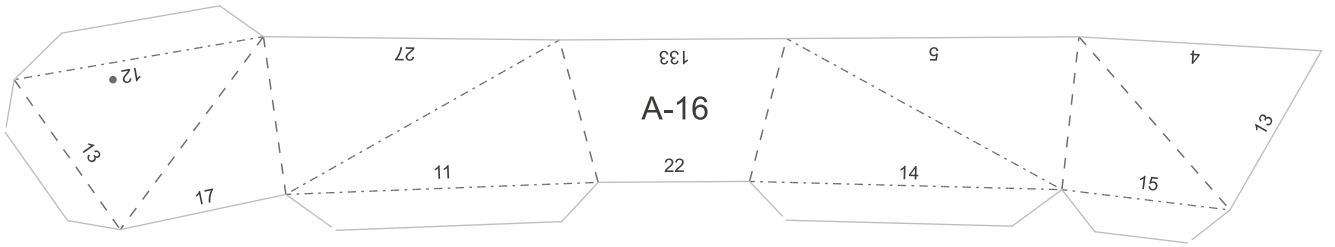

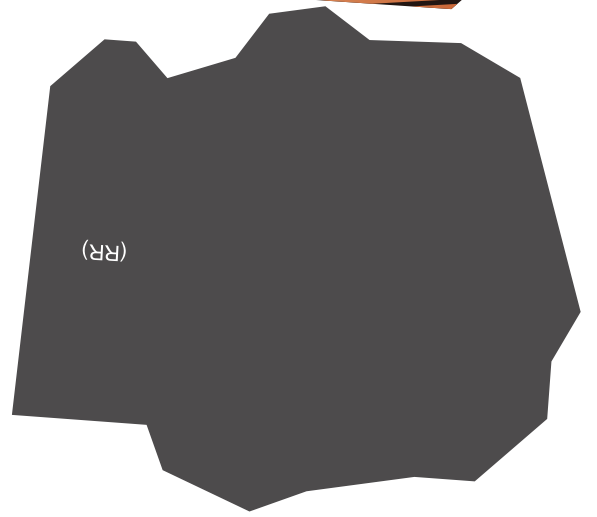

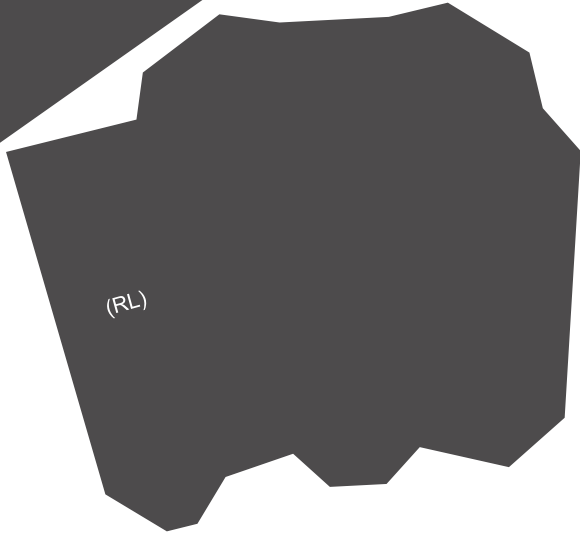

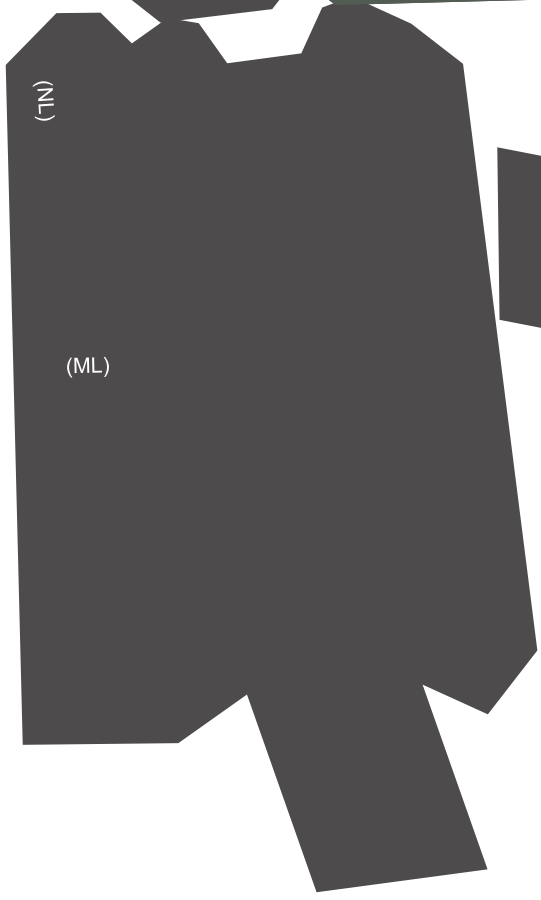

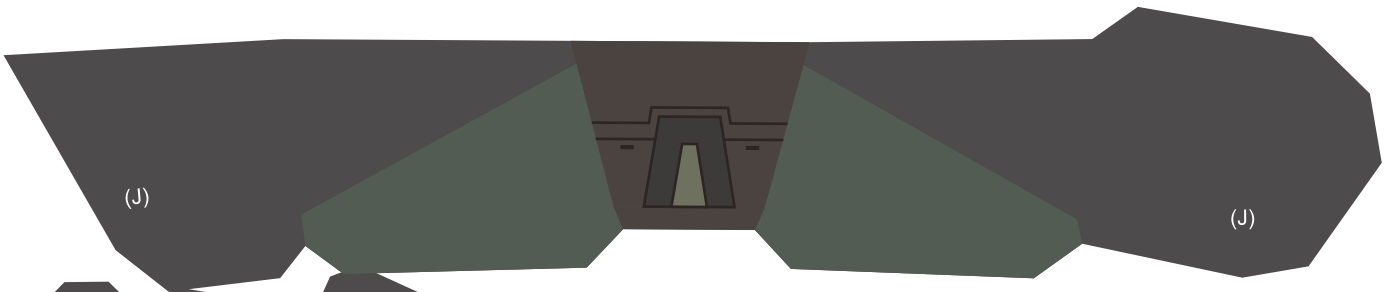

4. Începe să dai cu adeziv pornind de la aripioarele marcate cu „.” ca să-ți fie mai ușor să parcurgi pașii următori

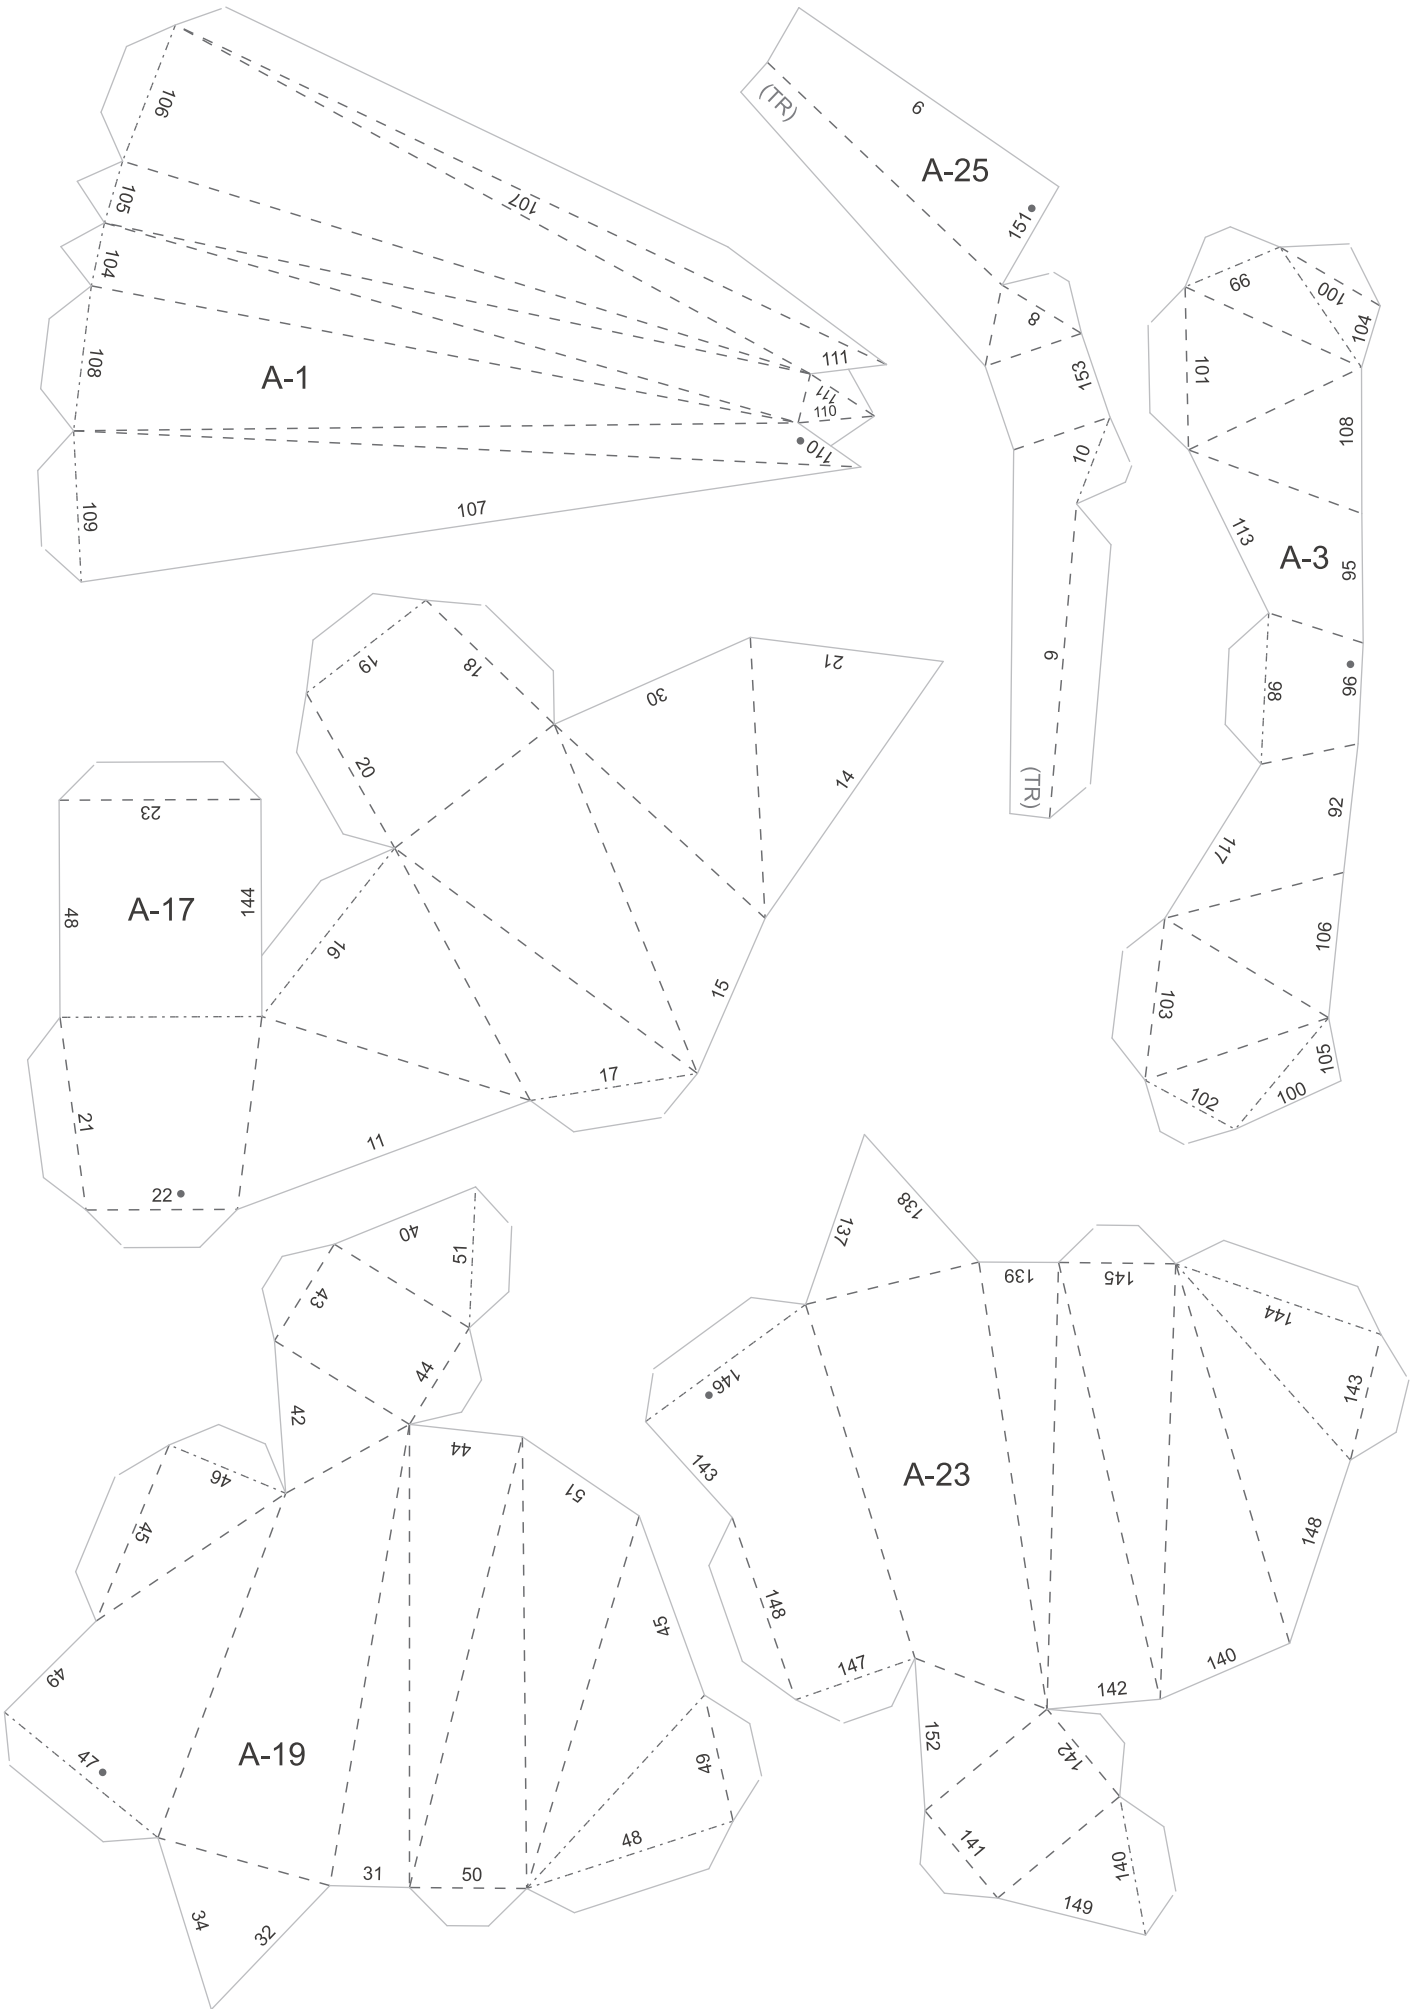

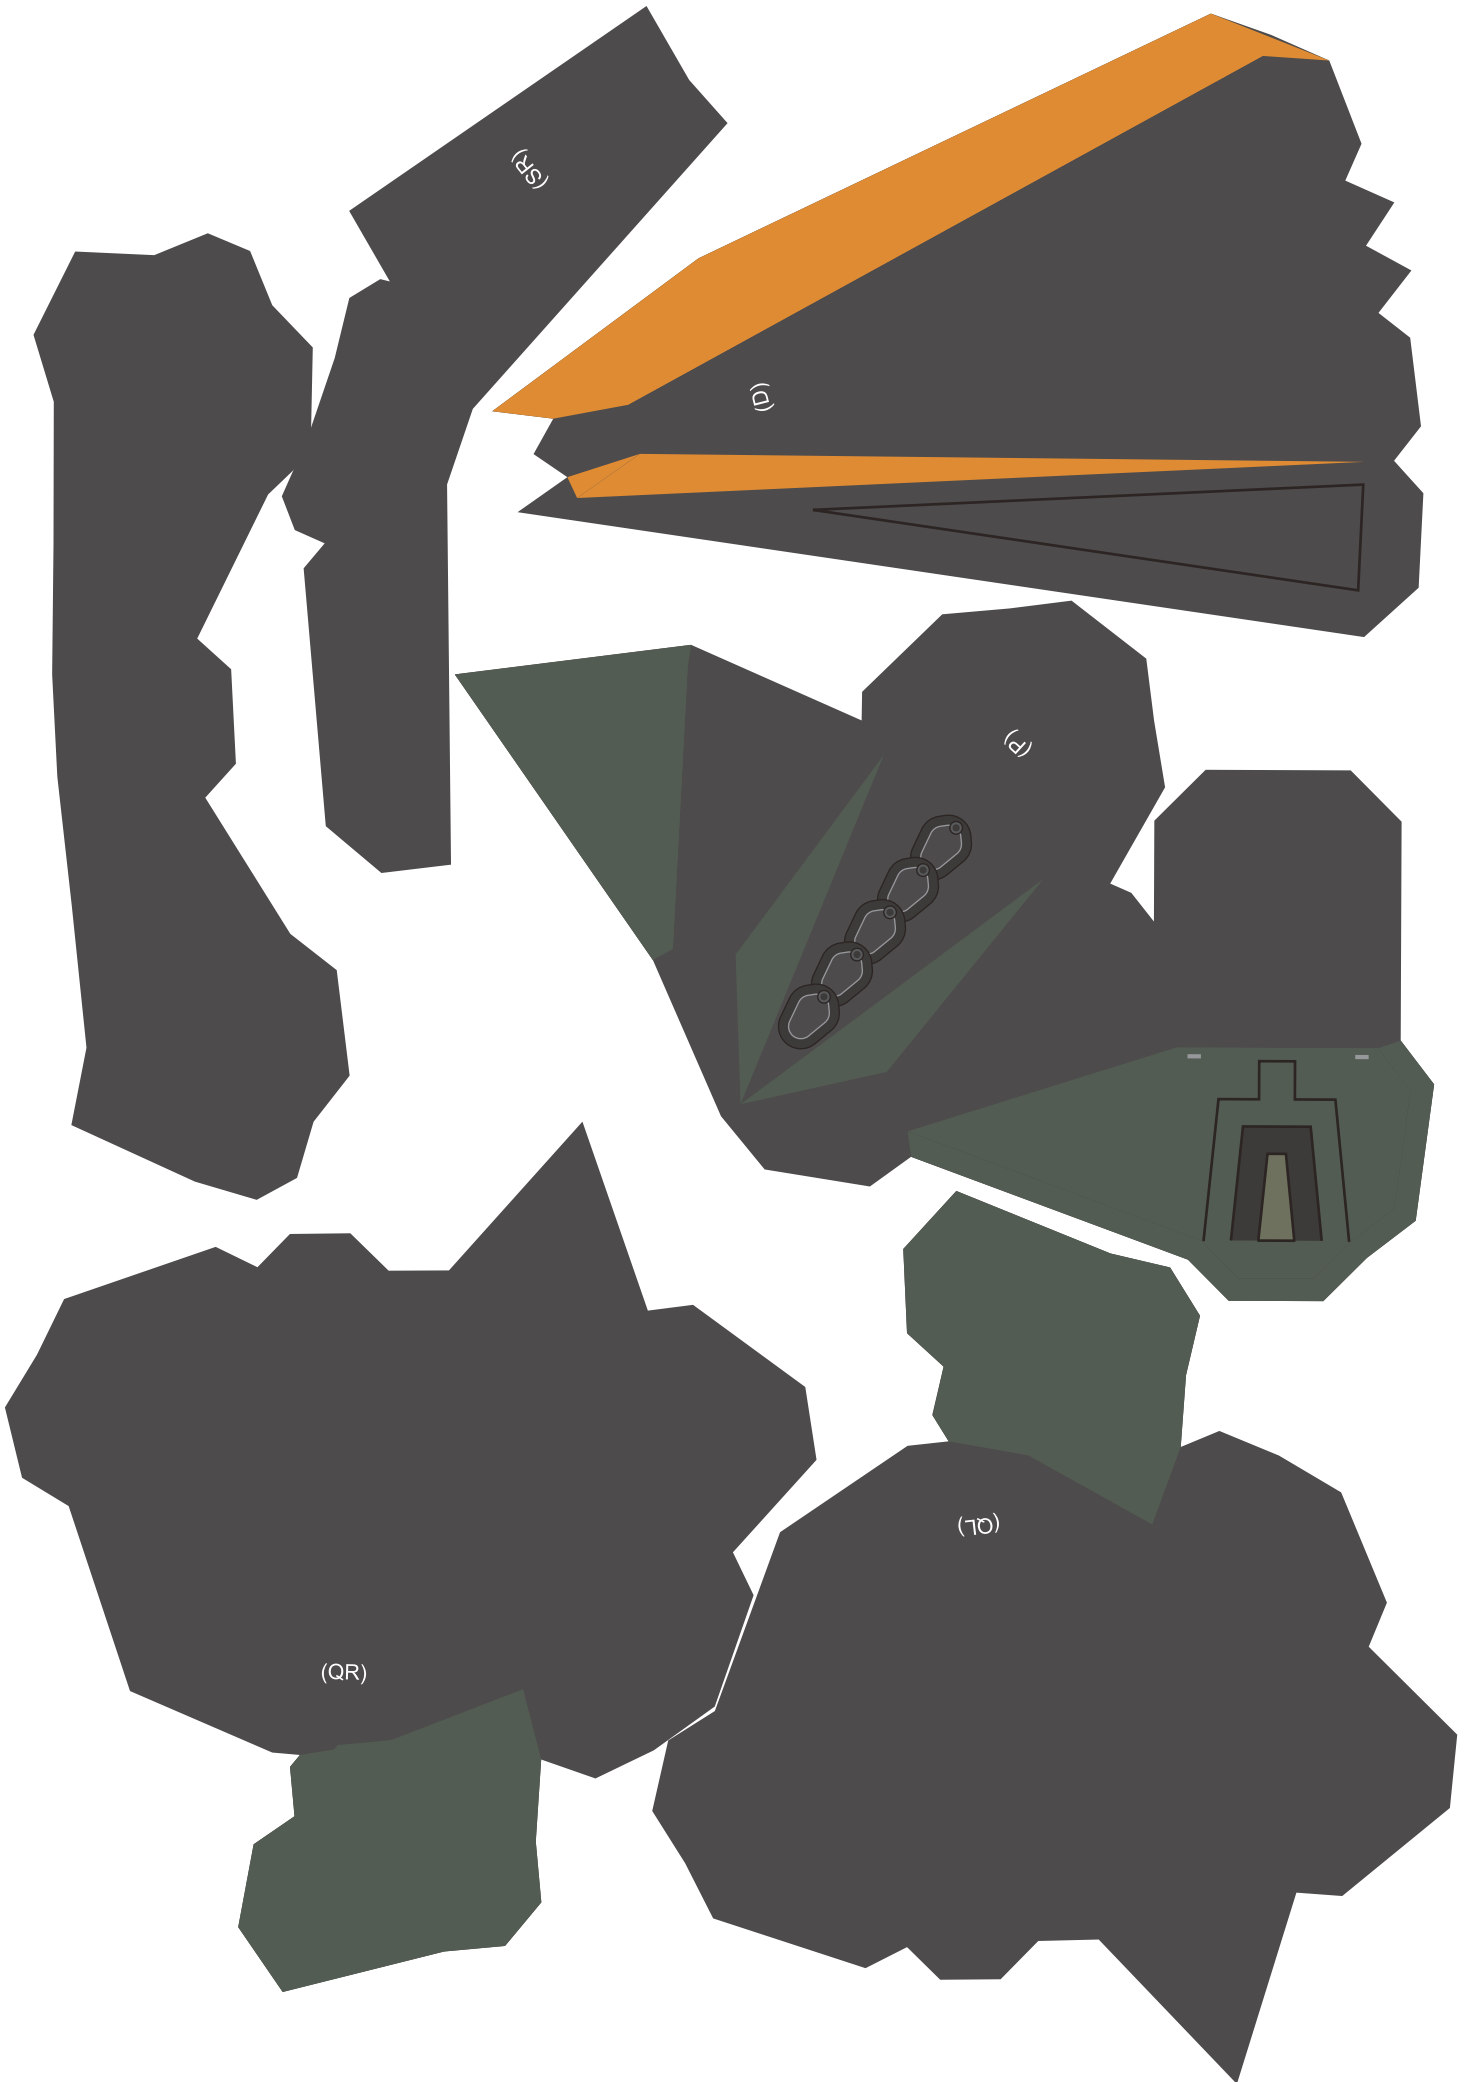

5. După ce assemblezi piesele suplimentare, potrivește numerlele de pe piese cu aceleași numere de pe corpul principal, apoi lipește-le pe zona dată cu adeziv sau introdu-le în locul potrivit.
