

RATCHET CLANK™

COSPLAY GUIDE

Ratchet

Ratchet would do anything to protect his galaxy and usually jumps boots-first into danger. His blasters are matched in skill only by his wrench-wrangling and his witticisms. The last Lombax in his universe, Ratchet was a lonely, orphaned mechanic longing to find his lost family when he met his perpetual partner-in-crime.

Clank's fateful crash-landing on Veldin led to the first of the duo's many adventures together, traveling to the ends of the universe to protect it from villains including, but not limited to, Dr. Nefarious. Though after spending so much time in retirement, he has begun to wonder- does he still have what it takes to be a hero?

Complete your Ratchet & Clank: Rift Apart cosplay with a 3D print of Ratchet's Omniwrench! 3D print files* available for [download here](#)

*3D print files are available individually for print, assembly required after 3D printing. Requires a 3D printer for print.

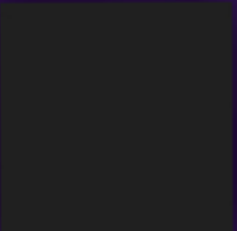

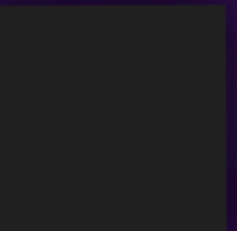

Clank

Clank is Ratchet's best friend, co-pilot, and the brains of the operation (though he'd never admit it). After meeting on the planet Veldin, he and Ratchet have gone on countless adventures, saving the universe from the forces of evil. In his free time, Clank has starred in his own holovision show and has recently been researching lost Lombax technology.

Rivet

Underground Resistance fighter, capable mechanic, and secret softie, Rivet is from a universe where she never had a robotic partner and, as a result, Nefarious reigns supreme. Determined to restore peace to her home, Rivet works tirelessly to dismantle the Emperor's dystopia one battle at time.

While she's known and admired by many around the galaxy for her heroics, she has never managed to win against their evil ruler. But despite the many losses, her spirit's never been broken - she's still convinced that she can win this fight. She has to.
